Sectoral/fishery Assessment or Ingredient Manufacturer Assessment Summary Report, v1.0
2.2.11

Instructions

This template is intended for reporting a summary of Due Diligence pathways 2 "sectoral/fishery assessment" or 3 "ingredient manufacturer assessment" under Principle 2. Reporting is at a UoC level and on an annual basis.

The UoC should select the pathway used and the type of assessment (whether ingredient manufacturer or plant/marine primary raw material).

The UoC enters the date the assessment was conducted.

The UoC selects the primary raw material assessed (if applicable). If primary raw material is not listed, the UoC enters the common name and latin name.

The UoC selects the risk factor assessed.

The UoC selects the country of location (ingredient manufacturer) or production (plant primary raw material). For marine primary raw material, 'Fishery' is selected as the Country of location.

The UoC selects the FAO fishing area for the marine primary raw material.

The UoC enters a summary description of the risk assessment (max 1500 characters).

The UoC enters links to any publicly available resources used.

The UoC enters a summary description of any measures taken to ensure low risk (for ingredient manufacturer assessment only) (max 1500 characters).

The UoC enters a summary description of implemented monitoring program to a) measure the effectiveness of any measure taken to ensure low risk (if applicable) and b) monitor the risk factors, or indicators for the risk factors, to ensure the risk level determined remains valid (max 1500 characters)

A new row should be added for each assessment and for each risk factor assessed (if more than one).
